

Da-Lite Tensioned DescenderPro, 107 x 190 cm with HD Progressive 0.9 - 10104628 **SKU: 10104628**

NOW AVAILABLE WITH SIGHTLINE – the new standard in screen-drop

SightLine is a new cable-drop system that makes the projection screen virtually float in your room when in use and completely disappears when not in use. See how it works

SightLine offers a new alternative to the standard black border above the projection area with 3 or 4 thin cables that can be extended up to 180 cm on-site. Now your view above the projection screens projection area is no longer blocked and gives the impression of a large floating image. Drop the projection screen to the height you need while preserving the look of the room when unrolled, the way the architect intended.

Check the images on the left and see how SightLine makes your room look even better. Don't let your projection screen block your room.

The DescenderPro is a ceiling recessed-projection screen that combines new installation features with a new motorized ALR surface option in addition to the high-resolution HD Progressive materials. The DescenderPro offers the possibility to just click-in the entire roller that includes the motor and screen surface after installation of the case. The case design offers a clean finish without gaps or visible screws, after attaching the bottom plate to the case.

- Roller with projection surface clicks into place
- Clean finish without gaps with a new closure panel
- Alternative direct mounting-option in addition to 2-step installation

- Various mounting positions on the cast for more flexibility
- Available up to 400 cm wide in small case design
- 5 year warranty

#### Tab-Tensioned:

The tab-tensioning system will keep the projection surface under a constant tensioning for a perfectly flat viewing area. A flat projection surface will get the most out of your projector, making sure no pixels get lost or deformed. If detail is important a perfectly flat projection area is vital.

Please note with traditional black drop models only: Adjust the unrolling settings of the projection surface only if absolutely required. Altering these settings may lead to a less uniformly flat projection surface. Also please be aware that modifying limit switches on tensioned projection screens will have an even more significant impact on surface flatness.

- SightLine replaces the standard black border above the projection area with 3 or 4 thin cables that can be extended up to 180 cm onsite. Now your view above the projection screens projection area is no longer blocked and gives the impression of a large floating image.
- The most comprehensive ceiling recessed projection screen in the market with tab-tensioned system for a perfectly flat screen surface. Redesigned and improved for ease of installation and a clean finish.
- The SightLine Cable-Drop System will unroll with 3 or 4 cables and can be extended up to 180 cm during installation.
- Easy Serviceability System – the roller with motor and screen surface can be ‘clicked’ in-place for easy installation and servicing. Once installed, the motor and screen surface remain accessible.
- A DescenderPro with SightLine will have the projection surface unroll from the front of the case, with the motor positioned on the right side.
- A DescenderPro with a traditional blackdrop will have the projection surface unroll from the back of the case, with the motor positioned on the left side..
- After installation, the closure panel and side-caps align for a clean finish without gaps.
- Choose between the unique 2-step installation or use direct 1-step installation-option.
- The tab-tensioning system will keep the projection surface under a constant tensioning for a perfectly flat viewing area.
- The case and the projection screen surface can be made to exactly the right size and the case is available in any colour for optimal integration into any interior.
- The Tensioned DescenderPro is supplied with a wall switch.
- The projection surface is extremely flat, making it suitable for all types of data and video projection.
- A five-year limited warranty on the DescenderPro range to match the high quality of the products.
